SOFT SKILLS

Multitasking
Self Motivated
Adaptable

Employee training
Negotiation Skills
Client Relationship Management

Team Leadership
Communication
Result Driven

PROFESSIONAL EXPERIENCE

Wisebits Group | Cyprus

November 2023 - Present

Moderation and Support Specialist

Processing customer requests and moderating data and content. Also developed a browser extension to increase efficiency.

Accomplishments:

- Developed several versions of a JavaScript extension for Google Chrome.
- Used RestAPI to retrieve data and display queue information.
- Implemented additional functionality in support pal to interact with the admin panel.
- Increased the speed of ticket processing.

Foxo Development | Latvia

February 2023 - April 2024

Frontend Developer

Developed and participated in Fintech projects. Mainly built components and implemented them into projects. Responsible for web development using React.

Accomplishments:

- Worked with back-end developers to integrate RESTful APIs and improve overall site functionality.
- Built reusable code and libraries for future use, ensuring consistency and maintainability.
- Collaborated with UI/UX designers to refine user interactions and enhance visual elements.
- Implemented responsive web design principles to ensure websites render well across multiple devices.
- Discovered new coding approaches.

Maxima Latvia | Latvia

November 2020 - March 2023

Warehouse Shift Leader

Responsible for staff, equipment, and warehouse. There were about 250 people under my supervision. Organized meetings, equipment issuance, training, and interviews.

Accomplishments:

- Increased the rate of product outbound by 45%.
- Set up communication between employees and transfer of information.
- Increased the actual working hours of the staff.
- Participated in the tender of equipment and work tools.
- Reduced mistakes and losses by 15%.

Maxima Latvia | Latvia

January 2017 - November 2020

Clients and Products Manager

Worked with customers and goods that came to the company's warehouse. Work with documents, accounting (SAP, Equinox). The main task was to ensure work on unloading of goods and its processing.

Accomplishments:

- Increased freight processing speed by 25%.
- Effectively worked in different teams & different clients.
- Always looking for best solutions, to solve problems.

PERSONAL PROJECTS

Car Hire

January 2024 - March 2024

This project is a car rent. The project uses React, Next.js, Redux, Typescript, Tailwind, and MongoDB to store the data.

GPT Prompts

October 2023 - December 2023

This project was made to create your own prompts for GPT chat. The project is made using React, Next.js and MongoDB to store the data.

Tshirt Shop

September 2023 - November 2023

This is an e-commerce project. The project uses React, Redux Toolkit, Typescript, SASS, and Mockapi to get the data.
